

VACUUM SYSTEMS

HD 14/18

Upright Vacuums Quality. Performance. Durability.

Protecting your carpet investment requires a powerful and dependable vacuum. Both the HD 14 and HD 18 have an onboard pullout wand with a stretch hose that expands to four times its stored length allowing them to perform detail work.

The HD 14 and 18 combine ergonomic design, effortless handling, quiet operation and superior soil removal. The ergonomic, lightweight handle ensures operator comfort while an indicator light signals when the bag is full.

The vacuum throat is easily accessible for unclogging trapped debris, and the electronic brush shut-off mechanism detects anything lodged in the brush roll, automatically shutting it down to protect the motor, belt, pulley and bearings. At 66 dB(A) the HD upright vacuums exceed industry standards for quiet vacuums while reducing worker fatigue and disruption to occupants in buildings.

The three stage filtration system includes a top-fill bag, an intake filter, and an exhaust filter. An optional HEPA filter providing 99.97% efficiency at 0.3 microns is also available. Both the HD 14 and HD 18 meet or exceed the standards required by LEED-EBOM and CIMS-GB, and they are also both approved by the Carpet and Rug Institute.

Key Features

- Four-position brush height adjustment with indicator light
- Bag full indicator light
- Won't run without a bag installed
- Electronic brush shutoff protects motor if brush becomes jammed
- Upper body goes right to the floor to get under beds and furniture
- Quick-change brush strip
- Four-stage filtration standard
- Optional HEPA filter available on all units
- V belt for long life
- 4:1 stretch hose
- Easy bag installation
- Dual-motor performance
- Optional accessories include dusting brush and upholstery tool
- Carpet and Rug Institute Certified
- Crevice tool standard

HX 14

HX Upright Vacuum Quality. Performance. Durability.

Protecting your carpet investment requires a powerful and dependable vacuum. The HX14 upright vacuum was designed from the ground up to be reliable, versatile and yet cost effective.

This dual motor unit boasts a 1000-watt vacuum motor providing 118" of water lift and 63 cfm of air flow. The brush roll turns at 4500 rpm, and the flat belt is designed to exceed 500 hours of use.

The HX 14 is extremely light and easy to maneuver and lies flat on the floor to get underneath beds and furniture.

The 4 stage standard filtration helps improve indoor air quality, and the bag full indicator informs the operator when to change the bag. To protect the motor, it will not run without a bag.

Simply pull the plate off to access the brush roll and belt - no tools required.

Change the belt, clean the brush roll or access any clogs in a snap.

Advancing Vacuum Technology

NaceCare is significantly improving upon the industry's leading **Canister and Backpack** programs

- By recovering 20% more soil
- By reducing noise levels
- By reducing energy consumption over 40%
- By doubling motor life - your machines now last twice as long

Recovering 20% More Soil Means

- Cleaner buildings and higher cleaning standards
- Improved carpet appearance
- Better Indoor Air Quality (IAQ)
- Longer carpet life (asset preservation)
- Improved cleaning due to better vacuum performance
- CRI approved and LEED-EB compliant

Reducing Noise Levels Means

- Better environment for building occupants with less interruption
- More areas can be daytime cleaned
- **Canister vacuums are now 47/45 dB(A)**
- **Backpack vacuums are now 52 dB(A)**

Increasing Motor Life to 2000+ Hours Means

- Longer machine life and less down time
- Lower cost of operation
- The current motor life of an upright is 500 - 800 hours
- The current motor life of canisters and backpacks is 700 - 1000 hours
- **Our motor life is in excess of 2000 hours**
- **Our motor warranty is 5 years***

Reducing Energy Consumption by 40% Means

- A more sustainable approach to cleaning
- Reduced energy costs with no negative effects on cleanliness or carpet appearance
- Savings of up to \$75 per year in energy costs

We stopped measuring **HORSEPOWER** and started measuring **PERFORMANCE**

REDUCED Noise Levels

40% LESS Energy Used

2000+ HOUR Motor Life

84% SOIL Recovery

Through extensive research and development on both motors and floor tools, we are able to provide a product with so many benefits and no downfalls.

PPR 200/HENRY

Provac Dry Canister Vacuums

PPR 200 (Henry) and PPR 380 have ultra efficient, high performance 680-watt vacuum motors providing in excess of 2,000 hours of life (over double the industry standard), and they come with 5-year commercial motor warranties. Both units consume 43% less energy than prior models and recover an industry leading 84% of soil prolonging your carpet's life. They are the industry's most sustainable high performance vacuums.

With noise levels of 45 dB(A) on low power and 47 on high, these units won't disrupt building occupants and are excellent for daytime cleaning. When equipped with a HEPA-FLO bag, our standard filtration is 0.3 micron at 99.97% efficiency, improving indoor air quality and reducing dust in the building.

Built for commercial use, they are equipped with a thermal overload for long-term motor protection and operator safety. The rewind head conveniently stores the 33' power cord internally, preventing cord damage from improper wrapping. They have a quick-change cord requiring no tools and come with a stainless steel telescopic wand.

Both units meet or exceed LEED-EBOM and CIMS-GB and are Carpet and Rug Institute approved.

PPR 390

Provac Dry Canister Vacuum

As the first canister vacuum to include on-board storage for more than just vacuum tools, the PPR 390 is in a class of its own. A telescoping handle allows for compact storage while the built-in wand holder makes transporting a breeze.

With a high performance 680-watt vacuum motor providing in excess of 2,000 hours of life (over double the industry standard), it comes with a 5-year commercial warranty. The PPR 390 consumes 43% less energy than its predecessor and recovers an industry leading 84% of all soil, prolonging your carpet's life.

With noise levels of 45 dB(A) on low power and 47 on high, it's excellent for daytime cleaning and won't disrupt building occupants. When equipped with a HEPA-FLO bag, our standard filtration is 0.3 micron at 99.97% efficiency, improving indoor air quality and reducing dust in the building.

Built for commercial use, the PPR 390 is equipped with a thermal overload for long-term motor protection and operator safety. The rewind head conveniently stores the 33' power cord internally, preventing cord damage from improper wrapping. It has a quick-change cord requiring no tools and comes with a stainless steel telescopic wand.

The 390 meets or exceeds LEED-EBOM and CIMS-GB and is Carpet and Rug Institute approved.

PSP 200/380

ProSave Canister Vacuum (Dry)

Our ProSave series of vacuums boasts a 680-watt motor that provides in excess of 2,000 hours of life (over double the industry standard) and comes with a 5-year commercial warranty. It consumes 43% less energy than its predecessor and recovers an industry leading 84% of all soil, prolonging your carpet's life.

With filtration of 98.6% efficiency @ 0.5 microns and a noise level of 47 dBA, these units are excellent for daytime cleaning. The cord wrap system stores neatly without tangles while our new "Plug Cable" system allows anyone to change the power cord quickly and easily, reducing downtime.

ProSave and NVH units weigh under 16 pounds, making transporting effortless. NVH 380 also includes a PTO socket for use with our A 350E electric power head kit.

All ProSave vacuums meet or exceed LEED-EBOM and CIMS-GB and are Carpet and Rug Institute approved.

PSP 200

PSP 380

NBV 180

Lithium polymer batteries

NBV 220

NBV 180/220

Battery Canister Vacuum (Dry)

With a noise level of only 45 dB(A), the NBV 180 and NBV 220 are excellent for daytime cleaning or cleaning congested or occupied public areas. Cord-free operation improves productivity significantly (in most cases over 50%) and eliminates accidents commonly associated with power cords, such as tripping. With 2 and 3 gallon tanks the NBV 180 and NBV 220 both offer plenty of capacity.

The 250-watt vacuum motor recovers 76% of soil on carpet ensuring excellent cleaning results and prolonging your carpet's life. It comes with a 5-year commercial warranty. With a run time of 45 minutes and stable power throughout the entire discharge, these vacuums have plenty of performance to get the job done.

The 36-volt lithium polymer battery can be interchanged between both units and charges in 2.5 hours. The on/off switch and battery status are conveniently located on the front of the machine for the operator to see at all times.

When equipped with a HEPA-FLO bag, the filtration is 0.3 micron @ 99.97% efficiency, improving indoor air quality and reducing dust in the building. Weighing in at only 14 pounds, the NBV 180 is compact and lightweight with a durable polyethylene tank.

At 20 pounds, the NBV 220 incorporates all features of our popular and very innovative PVR 390 vacuum including a structural foam tank for durability and built-in cart allowing easy transport of a second battery should it be required.

RSV 130/200

Backpack Vacuums Corded

With a high performance 680-watt vacuum motor providing in excess of 2,000 hours of life (over double the industry standard), the RSV 130/200 comes with a 5-year commercial warranty. Consuming 43% less energy than its predecessor, it recovers an industry leading 84% of all soil, prolonging your carpet's life and improving IAQ.

With a noise level of 52 dBA, it is excellent for daytime cleaning and won't disrupt building occupants. When equipped with a HEPA-FLO bag, the standard filtration is 0.3 micron at 99.97% efficiency, improving indoor air quality and reducing dust in the building. The adjustable back support, waist and shoulder straps are designed to minimize operator fatigue, and the hose features swivel fittings to ensure tangle-free operation. The patented tank design ensures no suction is lost no matter how full the bag is.

At only 10.8 pounds, the RSV 130 is among the lightest full-size backpacks on the market while the RSV 200 weighs in at only 12 pounds. For operator safety both units are fitted with a thermal protection device. They both meet or exceed LEED-EBOM and CIMS-GB and are Carpet and Rug Institute approved.

PVR 320H

HEPA Vacuums Critical Filtration

The NaceCare Series of Critical Filtration HEPA vacuums come in one- and two-motor configurations providing 100" of water lift and 120 cfm of airflow or 90" of lift and 160 cfm for excellent soil recovery. The motors carry two- and five-year warranties, and the HEPA filter is serialized and provides a minimum 99.97% filtration @ 0.3 microns.

Every machine is sodium flame tested after assembly to ensure they meet or exceed the European #3928 hazardous vacuum standard. Each unit comes with its own test certificate verifying the standard was achieved.

The PVR 320H has a polypropylene tank and a two-speed head that offers ultraquiet operation at 47 dB(A) on high and 45 dB(A) on low. It also offers a quick-change cord that doesn't require tools and an internal cord rewind system that protects the power cord. This unit is an outstanding choice for health-care facilities including hospitals, long-term care facilities and nursing homes. It provides all the filtration capabilities of our larger machines in a quiet, compact unit at a fraction of the cost.

NVQ 900H / WVD 900H

NVQ/WVD (Dry and Wet/Dry)

The NVQ 900H and WVD 900H units come with durable structural foam heads and tanks, making them extremely impact-resistant. They carry 10-year warranties on the tanks, providing peace of mind when transporting them. The WVD 900H also provides wet pick-up capability for hazardous materials that need to be dampened prior to recovery in order to prevent airborne contamination.

With new health standards such as the EPA's Lead Safe Certified Contractor program, HEPA vacuums are becoming more of a requirement for many industries today. Beginning April 22, 2010, federal law requires that contractors performing renovation, repair and painting projects that disturb more than six square feet of paint in homes, child care facilities, and schools built before 1978 must be certified and trained to follow specific work practices to prevent lead contamination. Our HEPA vacuums meet or exceed the EPA's requirements for such work.

WV 370/470

Wet/Dry Vacuums

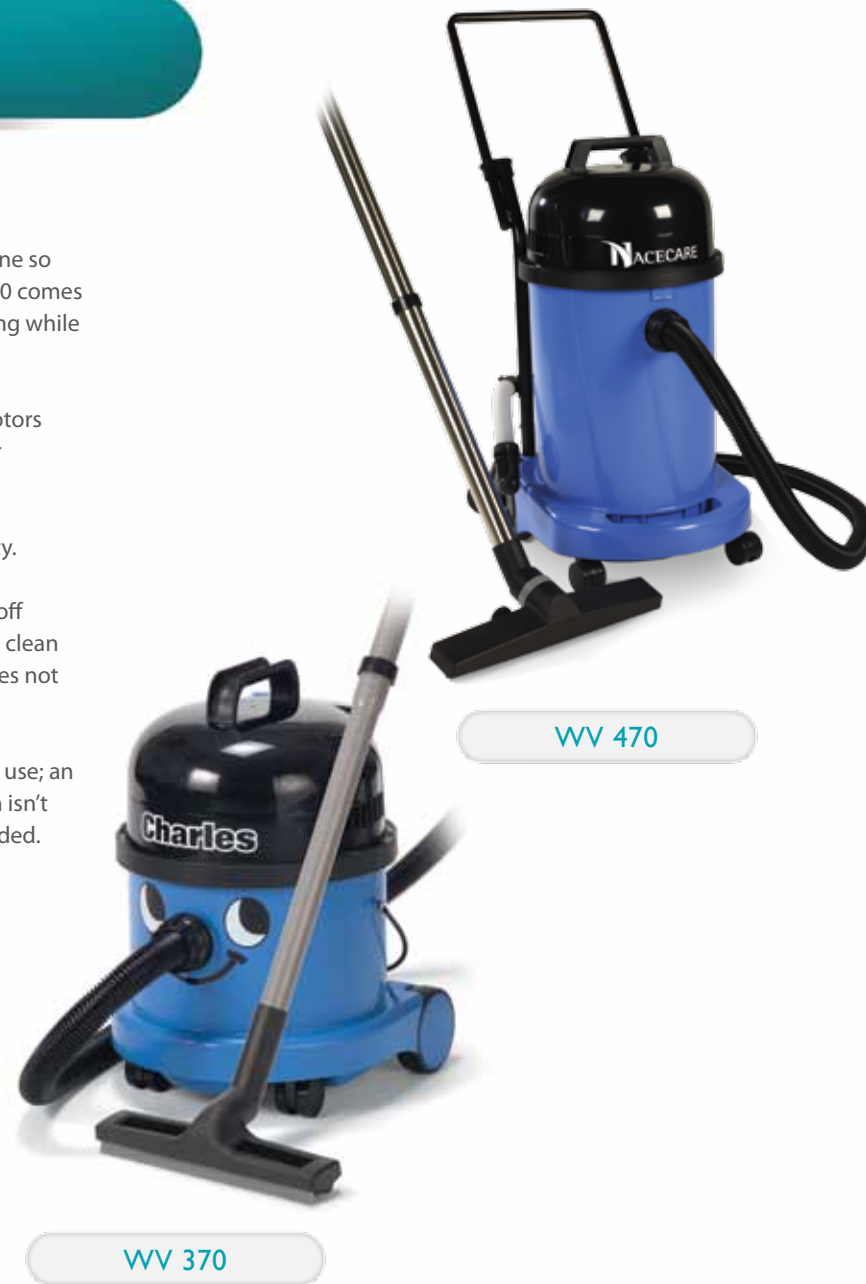

Both units are manufactured from polyethylene so there is absolutely nothing to rust. The WV 370 comes with a handy carrying handle for easy dumping while WV 470 has a drain hose.

Both are equipped with 1200-watt bypass motors providing 100" of lift and 95 cfm of airflow for excellent recovery wet or dry.

They come complete with a two-year warranty.

Each unit incorporates our ball float wet shutoff assembly: the ball rotates continually, staying clean and free from debris while ensuring water does not reach the motor.

Both are compact, maneuverable and easy to use; an excellent choice where a full-size wet vacuum isn't required or where use as a dry vacuum is needed.

WV 900/902

Wet/Dry Vacuums

The structural foam head of both the 900 and the 1800 series is rustproof and durable. Both the head and the tanks come complete with a 10-year warranty. The flexible dump tube permits quick and convenient emptying to a floor drain while the unique tip and pour system on the 900 series allows the tank to be emptied even when a floor drain isn't available.

A vapor barrier can be added to the units to eliminate moisture simply by putting a 13" floor pad into the top of the wet float assembly to prevent any foam or stripper from reaching the vacuum motor.

For wide-area cleaning, a 29" front-mounted squeegee kit can be fitted to either unit. Units with a front-mounted squeegee can recover water at 10,000 sq. ft. per hour.

The unique tip and pour system allows the tank to be emptied even in the absence of a floor drain.

WV 1800/1802P

WV 1800 Series High Capacity Wet Vacuums

The 1800 series wet vacuums deliver dependable power and performance in a rugged unit. Both the tanks and head are manufactured in structural foam and carry 10-year warranties. The DH models have a large-diameter dump hose for fast draining while the P model incorporates a sump pump enabling continuous pumping of fluid without interrupting the vacuuming process.

WVD 1802P Continuous Pumper

The WVD 1802P enables continuous pumping of liquids during the vacuuming process at a rate of 60 gallons per minute, so it is ideal for floods, water pipe ruptures, drain back-ups, and industrial spills. The submersible pump is made of durable, stainless steel for heat and chemical resistance. The motor uses a stainless steel shaft and triple seal system and has a thermal protection device to prevent overheating.

JS 1600C

Commercial Power Steamer

The power of steam attacks grease, grime, hard water deposits and mold—even kills bed bugs and their eggs—leaving the surface clean and sanitized, all without the use of chemicals.

Operator safety is assured by many features including the 12-volt steam controls, pressure switch, thermostat, high-limit thermal shutoff and pressure relief valve. The tank can be filled while unit is running, allowing for continuous use.

The JS 1600C is excellent on grouted floors, showers, kitchens and just about any area where detail cleaning is a challenge. It's very effective in all food preparation and processing areas and on stainless steel range hoods in industrial kitchens.

It can be used in hotel rooms for spotting draperies and cleaning bedspreads and carpets and even kills bed bugs on a hotel mattress!

In addition, the JS 1600C can now be used for cleaning floors simply by adding the optional "steam mop" which comes complete with a 33' hose. The continuous flow system provides all the steam needed to remove dirt and built-up soil from your floors while leaving them virtually dry!

K1622

K1622

With 1600 psi and 1.6 gpm (gallons per minute), the new K1622 has all of the cleaning power you need bundled into a compact footprint. It comes complete with 30-foot hose and variable nozzle (Vario). The Vario nozzle adjusts the spray from a fan to a pencil jet while the optional Dirt Killer nozzle rotates a pencil jet spray on an axis, creating a circle with tremendous cleaning ability.

Both units feature a pressure gauge, and stainless steel ceramic-coated pistons to reduce friction, ensuring years of heavy-duty use. Stainless steel valves and Teflon graphite rings allow it to run dry safely without damaging the pump.

MODEL	K1622
Pump	Brass, Triplex Piston
Pressure	1,600 psi
Motor	1.5 Hp, 13.0 amps
Volume	1.6 gpm
Max. Temperature	140° F
Power Cord	35'
Weight	40 lbs.
Pressure Hose	30'
Includes	Gun w/ Lance and Vario Nozzle

ACCESSORY KITS
